

nVent CADDY Telescoping Screw Gun Box Bracket, First Means

The nVent CADDY Telescoping Screw Gun Box Bracket, First Means is a simple and intuitive support for mounting electrical boxes within stud wall applications. This solution delivers both traditional and retrofit mounting, which allows the bracket to bend for multiple depths and mount from both the front and back of the stud—making it ideal for when drywall has already been installed. As the first means of support, conduit can be run directly to the electrical box while ensuring a smooth, flat drywall finish with side-mount installations. The notched and clearly marked bend points make installation safe, fast and easy.
