

Cable Entry Foam And Bottom Plate Gaskets, BG

A gasket that maintains the enclosure's protection degree when installing cables while increasing flexibility, as the cable's diameter does not need to be known before installation.

FEATURES

Description: The bottom of the enclosure is sealed by the use of an adhesive gasket applied on to the frame around the openings at the bottom of the enclosure. The cables are sealed by the addition of adhesive foam placed between the bottom plates. The elasticity and the size of this foam ensures a tight seal around most cables.

Pack quantity: 1.6 m adhesive foam (25 x 25 mm) and 6 m adhesive gasket (4.5 x 8 mm). For 1600 mm wide enclosures please order 2 sets.
