

Assembly Part

The flat underside and large bearing surface of a cheese head screw spread the clamping force over a wider area than many low-profile heads. This helps reduce surface damage on softer materials and prevent the head from sinking into plastics, aluminum, or thin sheet metal.

FEATURES

- Screw to fix front handle, Tip-up carrying feet, PMC Mezzanine or HF cassettes
- Slotted head requires flat-bladed screwdriver that enhances rotational leverage and simplify the installation process for fasteners

Product Type: Screw
