

# nVent CADDY Rod Lock Spring Steel Strut Nut, 1/4" Rod

## CATALOG NUMBER

**4QCN**

The QCN combines the unique properties of Spring Steel and CADDY "push-to-install" technology to create a snap in place strut nut with shockingly quick install of threaded rod or bolts. Use with a hex nut on threaded rod for fast install of prefabricated trapeze systems or with a truss head bolt for unbelievably fast wall mounting of electrical boxes and other services.

## FEATURES

Easy "push-to-install" design allows installers to simply push the threaded rod through the mounting hole, instantly holding it in position

Works with slightly damaged threads and minor burrs on the threaded rod

Perfect for quickly installing branch runs either at the load with standard strut or at the structure in combination with embedded strut

Integrated design eliminates the need for finicky spring nuts and loose hardware, simplifying installation

Quickly wall mount enclosures using common threaded bolts

Designed for use with standard strut widths (1 5/8" or 41mm) both shallow and deep profiles

## PRODUCT ATTRIBUTES

Material: Spring Steel

Finish: nVent CADDY Armour

Rod Size (RS): 1/4"

Height (H): 0.72"

A: 1 1/2"

B: 1 1/2"

Static Load 1 (F1): 75lb

Static Load 2 (F2): 20lb

Static Load 3 (F3): 30lb

Torque (TQ): 10 ft·lbf

## ADDITIONAL PRODUCT DETAILS

The QCN requires a longer bolt than standard strut nuts. See instruction sheet for detailed information.

In order to function properly on shallow strut (21mm or 13/16" deep), the QCN should be installed directly above a slot hole.
