

Copper Utility Ground Plate

The Copper Utility Ground Plate is designed to create an equipotential plane and help protect personnel and valuable equipment. This is particularly important in the utility industry, where safety is a top priority. The plate's large surface area helps to dissipate current into the ground, reducing the risk of electrical shock and equipment damage. Additionally, the plate is available with a pigtail configuration, making it a versatile solution for various applications within the irrigation industry.

FEATURES

Provides a large surface area to dissipate current into the ground

Lays flat underground and can attach the pigtail via a ground rod

SPECIFICATIONS

Catalog Number	Material	Connector	Length (L)	Width (W)	Thickness (T)
