

Wire Basket Tray Independent Underfloor Support, 304x558mm, Pregalvanized

CATALOGUSNUMMER

WBTUS12

The nVent CADDY Wire Basket Tray Underfloor Support provides a reliable method for routing wire basket trays beneath the floor with independent structural support. This component is ideal for installations requiring low-voltage cabling to pass under cabinets or equipment.

Engineered for stability and simplicity, the underfloor support system eliminates the need for complex framing. It braces the tray directly beneath raised floors, allowing for clean, unobtrusive cable pathways that preserve floor space and reduce visual clutter. This is especially valuable in data centers, control rooms, and other high-density environments where cable organization and accessibility are critical.

The Support integrates seamlessly with the broader nVent CADDY Wire Basket Tray System, ensuring compatibility with shaped and round wire tray profiles. Its design accommodates standard fasteners and finishes, including pre-galvanized, zinc electroplate, and powder coat options, making it adaptable to a wide range of project specifications.
