

铜制电线杆接地板

The Copper Utility Ground Plate is designed to create an equipotential plane and help protect personnel and valuable equipment. This is particularly important in the utility industry, where safety is a top priority. The plate's large surface area helps to dissipate current into the ground, reducing the risk of electrical shock and equipment damage. Additionally, the plate is available with a pigtail configuration, making it a versatile solution for various applications within the irrigation industry.

功能

提供较大的表面积，以便对地消散电流

绕于电线杆底部，以便安装
